Information and Communication

Codebreaking for Traditional Cipher Systems

Abe Wiersma

UNIVERSITEIT VAN AMSTERDAM

25th January 2016

Table of Contents

Traditional Ciphers

- Origin lies in ancient Egypt $\sim$ 4000 years ago.
- Ends after second world war with the emergence of the computers.

Uses

- War movement.
- Government Secrets.

Types: Traditional Ciphers

- Substitution Cipher
- Permutation Cipher
- Substitution and Permutation Cipher.
- Running key Cipher
- An Enigma-style periodic poly-alphabetic Cipher

Introduction in Ciphers

- Traditional Ciphers

Breaking Traditional Ciphers

- Substitution Cipher
- Permutation Cipher
- Permutation & Substitution Cipher
- Poly-Alphabetic Cipher
- Periodic Polyalphabetic Cipher
- Running Key Cipher

Modern Ciphers

Substitution Cipher: Example

A Caesar Cipher is a Substitution Cipher that shifts a regular alphabet. Here a Caesar Cipher with a left shift of 3:

Plain:	ABCDEFGHIJKLMNOPQRSTUVWXYZ
Cipher:	XYZABCDEFGHIJKLMNOPQRSTUVW

Decoding a Caesar Cipher text with our Caesar cipher.

Ciphertext:

QEB NRFZH YOLTK CLU GRJMP LSBO QEB IXWV ALD

Decoded Plaintext:

THE QUICK BROWN FOX JUMPS OVER THE LAZY DOG

Substitution Cipher: Problem

Substitution Cipher provided by Mathias

Substitution Cipher: Solution

Finding the solution is a process of small increments.

Analysis of the Cipher text gives us the number of different characters: 35

And also gives us the frequencies of the characters →

Character	Frequency in %
p	16.86
r	10.83
1	6.723
;	6.296
l	6.083
h	5.869

Substitution Cipher: Solution

A space is the most common character in the English language, which implies p decoded is ' ‘

We can also apply that the most common letter in the English language is the letter e, which implies that r decoded is 'e‘

Substitution Cipher: Solution

Substitution Cipher provided by Mathias

Substitution Cipher: Solution

From here words start to be distinguishable, and with the help of a English letter frequency table this is the result.

Substitution Cipher: Solution

UNIVERSITEIT VAN AMSTERDAM

Substitution Cipher provided by Mathias

```
everything now goes on at the gallop. there is a railway speed in the stirring
of the mind, not less than in the movement of the bodies of men. the social and
political passions have acquired such intensity, and been so widely diffused,
that their inevitable results are almost immediately produced. the period of
seed—time and harvest has become as short in political as it is in agricultural
labour. a single year brings its appropriate fruits to maturity in the moral as
in the physical world. eighty years elapsed in rome from the time when the
political passions were first stirred by tiberius gracchus, before its unruly
citizens were finally subdued by the art, or decimated by the cruelty of
octavius. england underwent six years of civil war and suffering, before the
ambition and madness of the long parliament were expelled by the purge of pride,
 or crushed by the sword of cromwell: twelve years elapsed between the
convocation of the states—general in 1789, and the extinction of the license of
the french revolution by the arm of napoleon. but, on this occasion, in one year
, all, in the meantime at least, has been accomplished. ere the leaves, which
unfolded in spring amidst the overthrow of thrones, and the transports of
revolutionists over the world, had fallen in autumn, the passions which had
convulsed mankind were crushed for the time, and the triumphs of democracy were
arrested. a terrible reaction had set in; experience of suffering had done its
work; and swift as the shades of night before the rays of the ascending sun, had
 disappeared the ferment of revolution before the aroused indignation of the
uncorrupted part of mankind. the same passions may again arise; the same
delusions again spread, as sin springs up afresh in successive generations of
men; but we know the result. they will, like the ways of the unrighteous, be
again crushed.
```

Substitution Cipher: Solution

Plain:	abcdefghiklmnopqrstuvwxyz ,-.1789:;
Cipher:	-:,.fy9suzaqcwp;rmk7vdxlrp1g8tbohni

BLACKWOOD'S MAGAZINE, Jan. 1845

Substitution Cipher: Solution

- All frequency properties of the underlying language remain intact.
- Thus are breakable by statistical frequency analysis

Introduction in Ciphers

Permutation Cipher: Solution

Solution

Permutation Cipher: Solution

Permutation Cipher provided by Mathias

BUT IN THE BRITISH EMPIRE, FOR A CENTURY PAST, IT HAS BEEN THOROUGHLY UNDERSTOOD , BY MEN OF SENSE OF ALL PARTIES, THAT A CHANGE OF DYNASTY IS OUT OF THE QUESTION, AND THAT THERE IS NO REFORM WORTH CONTENDING FOR IN THE STATE, WHICH IS NOT TO BE EFFECTED BY THE MEANS WHICH THE CONSTITUTION ITSELF HAS PROVIDED. THIS CONVICTION, LONG IMPRESSED UPON THE NATION, AND INTERWOVEN AS IT WERE WITH THE VERY FRAMEWORK OF THE BRITISH MIND, HAVING COME TO COINCIDE WITH THE PASSIONS INCIDENT TO PARTY DIVISIONS IN A FREE STATE, HAS IN PROCESS OF TIME PRODUCED THE STRANGE AND TORTUOUS POLICY WHICH, FOR ABOVE A QUARTER OF A CENTURY , HAS NOW BEEN FOLLOWED IN THIS COUNTRY BY THE GOVERNMENT, AND LAUDED TO THE SKIES BY THE WHOLE LIBERAL PARTY ON THE CONTINENT. DEPRIVED OF THE WATCHWORDS OF MEN, THE PARTIES HAVE COME TO ASSUME THOSE OF THINGS. ORGANIC OR SOCIAL CHANGE HAVE BECOME THE WAR–CRY OF FACTION, INSTEAD OF CHANGE OF DYNASTY. THE NATION IS NO LONGER DRENCHED WITH BLOOD BY ARMIES FIGHTING FOR THE RED OR THE WHITE ROSE, BY PARTIES STRIVING FOR THE MASTERY BETWEEN THE STUART AND HANOVER FAMILIES, BUT IT WAS NOT LESS THOROUGHLY DIVIDED BY THE CRY OF ”THE BILL, THE WHOLE BILL, AND NOTHING BUT THE BILL,” AT ONE TIME, AND THAT OF ”FREE–TRADE AND CHEAP CORN” AT ANOTHER. SOCIAL CHANGE, ALTERATIONS OF POLICY, HAVE THUS COME TO BE THE GREAT OBJECTS WHICH DIVIDE THE NATION; AND, AS IT IS EVER THE POLICY OF OPPOSITION TO REPRESENT THE CONDUCT OF GOVERNMENT AS ERRONEOUS, IT FOLLOWS, AS A NECESSARY CONSEQUENCE, THAT THE MAIN EFFORTS OF THE PARTY OPPOSED TO ADMINISTRATION ALWAYS HAVE BEEN, SINCE THE SUPPRESSION OF THE REBELLION IN 1745, TO EFFECT, WHEN IN OPPOSITION, A CHANGE IN GENERAL OPINION, AND, WHEN IN POWER, TO CARRY THAT CHANGE INTO EFFECT BY A CHANGE OF POLICY. THE OLD LAW OF NATURE IS STILL IN OPERATION. ACTION AND REACTION RULE MANKIND; AND IN THE EFFORTS OF PARTIES MUTUALLY TO SUPPLANT EACH OTHER IN POWER, A FOUNDATION IS LAID FOR AN ENTIRE CHANGE OF POLICY AT STATED PERIODS, AND AN ALTERATION, AS GREAT AS FROM NIGHT TO DAY, IN THE OPINIONS AND POLICY OF THE RULING PARTY IN THE SAME STATE AT DIFFERENT TIMES.

Permutation Cipher: Solution

- With enough computer power each possible ‘anagram’ can theoretically be calculated and thus the code can be brute forced.
- Though in practice with large blocksizes this is pretty hard, but then one can probably solve anagrams within the blocksize which also reveals the key and blocksize.

Permutation & Substitution Cipher: Solution

Again finding the solution is a process of small increments.

Analysis of the Cipher text gives us the number of different characters: 35

And also gives us the frequencies of the characters →

Character	Frequency in %
J	17.70
I	10.25
Z	6.642
'	6.496
T	5.985
F	5.802

Permutation & Substitution Cipher: Solution

A space is the most common character in the English language, which implies J decoded is ' ‘
We can also apply that the most common letter in the English language is the letter e, which implies that I decoded is 'e‘

Permutation & Substitution Cipher: Solution

From here we start filling in letters, like tTe→the. With the help of a English letter frequency table and knowledge of the English dictionary, word by word you get the solution.

Permutation & Substitution Cipher: Solution

Permutation & Substitution Cipher provided by Mathias

```
this was quite satisfactory to henry and his friends; and without waiting any further ceremony,
they started off for the school. in the mean time greene, having ascertained that they were gone
 to his father's to made enquiry, had confessed that it was he who had stolen the money out of
scott's box; and when they returned, he was surrounded by all the boys, who were upbraiding and
taunting him with his villany. his own friends too were against him; and, from shame and
agitation of mind, he looded most wretchedly. it is impossible to describe the scene which now
tood place in the school—room. henry, whose mind was relieved from the depression occasioned by
this disgraceful charge, was caressed and congratulated by every boy in the school. mrs. harris
dissed him affectionately, and said she felt confident of his innocence from the first, and had
never despaired of its being made evident. Huliana and eli ,a were also amongst the first to
bestow their approbation upon his conduct. george and little ned were delighted beyond measure
to see their friend once more made happy, and hoped soon to have him as the chief in their
youthful sports. but it was far different with greene, who now felt all the wretchedness of one
convicted of theft, and detected in basely attaching the disgraceful charge to an innocent and
praiseworthy lad. he had taden his seat at the extremity of the school—room, and was hiding his
face in his hands; and though a boy of wonderful spirits and strong nerve, was now bathed in
tears, and sobbing aloud. dr. harris, who had been giving him a very severe lecture, still stood
 over him, impressing upon him the necessity of retiring into his room, to seed from god that
forgiveness in prayer and repentance, which, he too much feared, would not be easily obtained
from his offended and disgusted school—fellows. he now, therefore, arose, and made his way
towards the door, in doing which he had again to encounter the execrations and pointed fingers
of the boys, who cried, as he passed them, "go, thou thief " and followed him until they saw him
 enter the house. henry, however, was the only lad who did not upbraid him; for, though greene
had behaved in so disgraceful a manner towards him, he could not but feel distressed to see him
appear almost brodenhearted. he still remembered, in the midst of his Hoy, that but a few hours
had elapsed since he felt all the wretchedness of one supposed to be guilty of theft. "what then
," he said to himself, "must be the feelings of him who stands convicted of the crime, and
therefore has not the consciousness of innocence to support him! i cannot find in my heart to
upbraid him," he said, as he tood george and ned by the hand and led them across the lawn.

g k l n p r t v z & x y s o m q i h f d b a c e

Poly-Alphabetic Cipher: VIGENÈRE CIPHER

Invented by:
Giovan Bellaso $\sim$ 1553
Works by:

- Using a key with a polyalphabetic cipher.
- Switching alphabet with the key every character.
- Keep repeating the key over the plaintext.

Running Key Cipher: Problem

Running Key Cipher: Solution

Modern Ciphers

- Private-key cryptography, where the same key is used for encryption and decryption.
- Public-key cryptography, where two different keys are used for encryption and decryption.

Ciphers can be distinguished into two types by the type of input data:

- Block ciphers, which encrypt block of data of fixed size
- Stream ciphers, which encrypt continuous streams of data

Stelling

Theorem (Massa-energierelatie)

$E = mc^2$
